

ALPHA CHAIR GUIDE

Mission Critical. Mission Comfortable.

At Winsted we understand that Mission Critical Control Rooms are high-stress environments, and those standing watch work long shifts to support the mission. That's why the right chair is a critical part of the operator's environment. Chairs built and warranted for 24/7 intensive use with heavy-duty steel base construction and all the key ergonomic adjustments.

The Alpha is one of the most comfortable 24/7 chairs you can sit in because of its special Skydex technology. The seat cushion isn't made of foam but a patented cushion with air channels that offers 43% reduction in pressure and 53% better weight distribution. This chair also includes all the ergonomic adjustments you need.
